

LIST OF MAJOR LANDOWNERS IN CORNWALL

Archaeological contractors recognise that there are backlogs of archaeological archives at the Archaeological Units that require depositing at museums. One of the reasons that backlogs have occurred is that archaeologists find that, after many years, landowners become difficult to contact due to changes of names and addresses. This list is provided to assist archaeological contractors to find the contact details of major landowners in Cornwall. It can be used for contacting the appropriate person, where known, in an organisation regarding the signing over of the Transfer of Title for finds archives at the museum.
